About

The general objective of the Master's Degree in Occupational Health and Safety Management is to provide an advanced educational program and qualification for Senior Occupational Safety Technicians and Occupational Health and Safety Management System Managers, in accordance with the parameters defined by labor legislation and the Professional Certification in the area, as defined by the professional statute for Occupational Safety activities (Law no. 42/2012). This certification is a requirement for professional practice in the area, as well as one of the determining factors in achieving effective implementation of occupational safety and health practices and principles, as defined in the legal framework. The master's course also has a strong management component, in particular for the development or improvement of established skills in directing, implementing or evaluating Occupational Safety and Health Management Systems in the context of productive organizations, promoting their individual enhancement both in technical and scientific terms and in terms of personal training and interrelationship in work organizations. The aim is also to inculcate a professional attitude that motivates the continuous improvement of work processes and the implementation of good practices that contribute to increasing safety levels and a culture of prevention in organizations.
